1st Assignment

Project Name:

FoodCircle

Project Idea:

FoodCircle is a mobile application that helps reduce food waste by connecting restaurants, bakeries, and food stores with charities, volunteers, and families in need. Businesses can post extra food that is still safe to eat, and users can reserve and collect it before it expires.

The app also includes a feature called Fresh Timer, which shows the remaining time available to collect the food. Once the timer ends, the food item is automatically removed from the app.

Problem Statement:

Many restaurants and bakeries have extra food at the end of the day that is still safe to eat, but it is often thrown away. At the same time, many families and charities need food but have no easy way to find available donations. FoodCircle solves this problem by creating a simple and organized platform that connects food donors with people who need it.

Project Objectives:

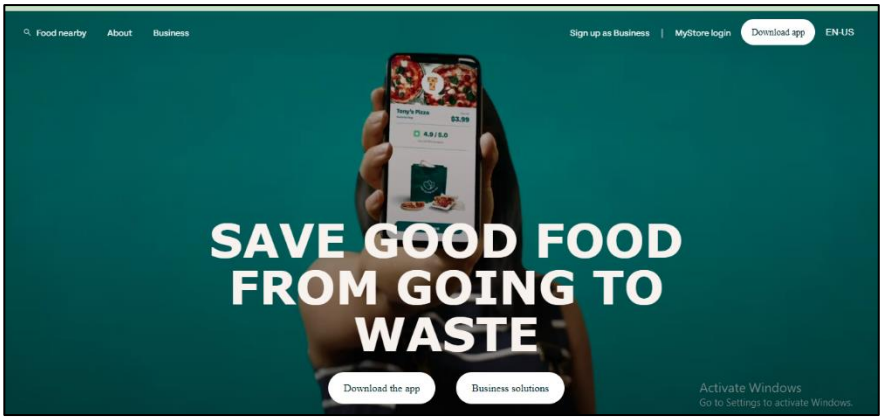

- Reduce food waste by making use of extra food.
- Make food donations easier and faster.
- Connect restaurants with charities, volunteers, and people in need.
- Organize the food collection process through one application.
- Use the Fresh Timer feature to display the remaining time before food expires.

Competitor Analysis:

Website	Strengths (UX/UI)	Weaknesses (UX/UI)
Too Good To Go	Clean interface, easy booking process, simple navigation	Mainly focuses on selling discounted food instead of donations
OLIO	Easy to share food, simple registration, user-friendly design	Too much information on some screens may confuse new users
ShareTheMeal	Attractive design, easy to use, smooth user experience	Focuses on money donations instead of sharing real food
Karma	Modern interface, fast browsing, simple food search	Does not clearly show how long the food will remain available

Persona:

Persona 01:

- Age:23
- Name: Ahmad
- Frustrations:
    - Sees a lot of food being wasted every day.
    - Doesn't know an easy way to donate extra food.
- Needs:
    - A quick way to upload available food.
    - To know who will collect the donation.
- Goals:
    - Reduce food waste.
    - Help people in need.

Persona 02:

- Age:38
- Name: Hanan
- Frustrations:
    - Sometimes needs food support but doesn't know where to find it.
    - Feels uncomfortable asking for help directly.
- Needs:
    - A simple and easy-to-use application.
    - Nearby food collection locations.
- Goals:
    - Get food easily.
    - Support her family's daily needs.

Persona 03:

- Age: 27
- Name: Omar
- Frustrations:
    - Finds it difficult to know where volunteers are needed.
    - Doesn't know when food donations become available.
- Needs:
    - Notifications for new food donations.
      A map showing collection locations.
- Goals:
    - Volunteer in community work.
    - Help deliver food quickly.

Persona 04:

- Age: 34
- Name: Sara
- Frustrations:
    - Receives many food donation requests through phone calls.
    - Finds it difficult to organize food distribution.
- Needs:
    - A dashboard to manage all donation requests.
    - The ability to track every food collection request.
- Goals:
    - Organize the distribution process.
    - Save time and effort.

Special Feature – Fresh Timer

One unique feature in FoodCircle is Fresh Timer. Every food item has a countdown timer showing how much time is left before it should no longer be available. When the timer reaches zero, the item disappears automatically. This helps users collect fresh food on time and increases trust in the application.
